## INTERSHIP EXPERIENCE

---

### BFC Softtech | (6 Months)

- Developed and deployed **HRMS (Human Resource Management System)** using **Python, Django, and SQL**.
- Implemented features like **employee management, role-based access, and dashboard integration**.
- Worked on **CRUD operations, authentication, and REST API development** for HR modules.

## PROJECTS

---

### 1.HR Analytics Dashboard: Employee Attrition Analysis using PowerBI

- The goal of this project is to analyze employee attrition trends and identify key factors such as education level, age, salary slabs, job roles, and years at the company. This helps organizations make data-driven decisions to improve employee retention and optimize workforce strategies.

### 2.Human Resource Management System (HRMS)

#### *Final Year MCA Project | Django, Python, HTML, CSS, JavaScript, SQLite*

- Developed a web-based HRMS to manage employee records, attendance, leave requests, and payroll.
- Implemented modules for user authentication, employee management, role-based access, and HR dashboard.
